# **Authentic flavors**

With 11 shops and after 15+ years in business, this former Patagonian ice cream brand grew to become a coffee shop and a kitchen after developing different lines of genuinely made successful products —specialist coffee, dough bread, sandwiches and artisan chocolate, to eat-in or take-away—, evolving the brand's universe.

We joined Del Viento to illuminate the brand strategy from a business development perspective, helping with the marketing side of the product design process. We generated the tone, voice and content narrative with clear core messages correspondent to each line of products.

### The wind always leaves a mark

The wind in Patagonia often goes beyond a hundred kilometres per hour, turning on the fire in the hearts of those who dare. It always leaves a mark.

Every product of the brand is elaborated in the Patagonia, the south of Argentina. Ice cream making,

origin coffee roasting, artisan chocolate, dough bread and sandwiches made with love in their eleven shops located all over the region and in Buenos Aires.

Del Viento has the spirit of the Patagonia: tenacious, modern and foodie as well as incredible and adventurous.

## The pathway

Del Viento mission is to take people back to the origins of cooking and awake their senses through a range of flavours, fragrances and textures, using sustainably grown natural ingredients, free of artificial preservatives, for those whose dreams take them to the south of the world.
